Funcionalidades “user centric” de los catálogos. vuFind

The screenshot shows a search results page in Mozilla Firefox. The browser address bar displays the URL: <http://www.vufind.org/demo/Search/Home?lookfor=medical&type=all&submit=Find>. The page lists search results for medical-related items. Annotations highlight several user-centric features:

- Servicio externo de provisión de tapa escaneada o reader on-line:** Points to the book cover image for "Medical ethics in the ancient world" by Carrick, Paul.
- Conectividad ILS:** Points to the "Checked Out" status indicator for the same book.
- Ordenamiento por ranking u otros criterios:** Points to the vertical scroll bar on the right side of the page.
- Favoritos MyLibrary:** Points to the "Add to favorites" button for the first search result.
- Resultados Facetados, Otros resultados (serendipity):** Points to the faceted navigation sidebar on the right, which includes categories like Author, Language, Genre, Era, and Region.

The search results include:

What is LibrarySite 2?

- LibrarySite 2 is our package of services to painlessly enable you to create and maintain an attractive and up-to-date Web presence.
- LibrarySite 2 is available for installation on your server (Linux or Windows) or we can host it for you.
- LibrarySite 2 is built on free, open-source software including Drupal, MySQL and PHP.

Extensible Structure

- Built with a modular structure on PHP and MySQL, LibrarySite can be extended to create custom functionality.
- Library systems including catalogs and databases can be integrated into the site.
- In the spirit of open-source, custom code we create will be released under GNU GPL.

Support & Training

- Full documentation online.
- Online support forums
- Unlimited email support.
- Live training delivered online via GoToMeeting or Acrobat Connect.

New module on d.o. called 'oai2forcck'

Tue, 2008-08-19 16:51 — mark

[oai2forcck](#) provides an [OAI-PMH](#) (Open Archives Initiative Protocol for Metadata Harvesting) gateway for content type created with CCK (Drupal 5 only). If you don't already know what OAI-PMH is, you probably don't care about this module.

Some examples. All expose unqualified Dublin Core.

Taxonomy

Categories:
 Events: Community Event
 Branches: North Branch
 Audience: Seniors
 Free-tagging:
If you would like to create your own tag enter it here.

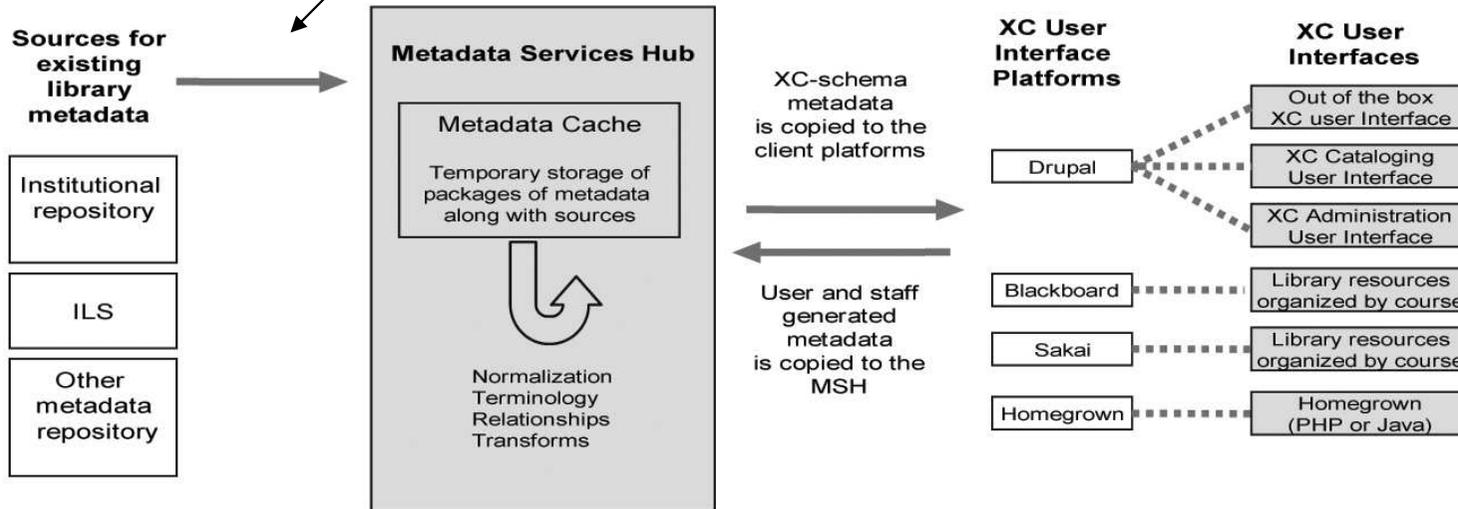

- Categorize and classify events any way you want.
- You can set up classes, categories and terms using the taxonomy module or you can add terms on the fly with Free-Tagging.

RSS

- Several content types can be syndicated with RSS. You can keep your patrons informed without the need to send email.

Eric S. Raymond

"Eric Steven Raymond" (born December 4, 1957), often referred to as "ESR", is a computer programmer, author and open source software advocate. His name became known with hacker culture when he became the maintainer of the "Jargon File". After the 1997 publication of "The Cathedral and the Bazaar", Raymond became, for a number of years, an informal representative of the open source movement.

Review by Book Description
The Cathedral & the Bazaar is a must for anyone who cares about the future of the computer industry or the dynamics of the information economy. Its conclusions will be studied, debated, and implemented for years to come. According to Bob Young, "This is Eric Raymond's great contribution to the success of the Open Source Revolution, to the adoption of Linux-based operating systems, and to the success of open source users and the companies that supply them." The interest in open source software development has grown enormously in the past year. This revised and expanded hardback edition includes new material on open source developments in 1999 and 2000. Raymond's clear and effective writing style accurately describing the benefits of open source software has been key to its success. With major vendors creating acceptance for open source within companies, independent vendors will become the open source story in 2001.

Record Tagging =en una red social?
 For the IT: "The term 'Web 2.0' can be seen like a label placed on a whole of technologies and practices in the development of software. Thus, tags are added in quasi all web applications. Some of these practices, like API and mashups based on these API let us predict what could be the semantic Web".

¿FOLKSONOMÍAS?

Redes sociales alrededor de libros. API exposed.

The screenshot shows the LibraryThing website interface. At the top, there's a navigation bar with 'Portada', 'Buscar', 'Panorama actual', 'Conversar', 'Grupos', 'Local', and 'Blog'. Below this, a green banner reads 'Nuevo: Mira el panorama actual sólo para tu idioma.' The main content area is divided into several sections:

- Resumen de panorama actual:** Includes 'Firehose meet mouth.' and 'Estadísticas Vitales' with metrics like Members (488,733), Libros catalogados (31,162,503), and Ratings (4,795,042).
- Los 25 libros más reseñados (ver más):** Lists top books like 'Harry Potter y las reliquias de la muerte' (664 reseñas) and 'El Código Da Vinci' (593 reseñas).
- Los libros más nombrados:** Lists books like 'Harry Potter and the Philosopher and the Half-Blood Prince' (32,109) and 'The Phoenix' (31,209).
- Harry Potter y las reliquias de la muerte por J. K. Rowling:** A detailed view of the book with a table of statistics:

Socios	Reseñas	Popularidad	Valoración promedio	Conversaciones
23,557	664	13	★★★★½ (4.44)	139
- Etiquetas de los socios:** A list of tags such as 'adventure', 'boarding school', 'British children', 'children's books', 'children's fiction', 'children's literature', 'coming of age', 'death', 'England', 'english', 'fantasy', 'favorite', 'fiction', 'friendship', 'hardcover', 'harry potter', 'Hogwarts', 'hp', 'J.K. Rowling', 'juvenile', 'juvenile fiction', 'kids', 'Magic', 'mystery', 'novel', 'OWN', 'owned', 'potter', 'read', 'read in 2007', 'Rowling', 'School', 'Series', 'Voldemort', 'witchcraft', 'Wizards', 'wizadry', 'Wizards', 'ya', 'Young Adult'.
- Recomendaciones de LibraryThing:** A list of recommended books, including 'Harry Potter and the Half-Blood Prince' and 'Thursdays Next: First Among Sequels'.

On the right side, there are promotional boxes for 'Comprar, tomar prestado, intercambiar o vista' (Amazon.com, IberLibro.com, Worldcat), 'Portadas populares' (showing book covers), and 'Ads by Google' for 'Harry potter'.

Scoring, Funcionalidad también agregada en algunos catálogos.

Implicancias Tecnológicas. Adopción Add-ons OPAC's 2.0

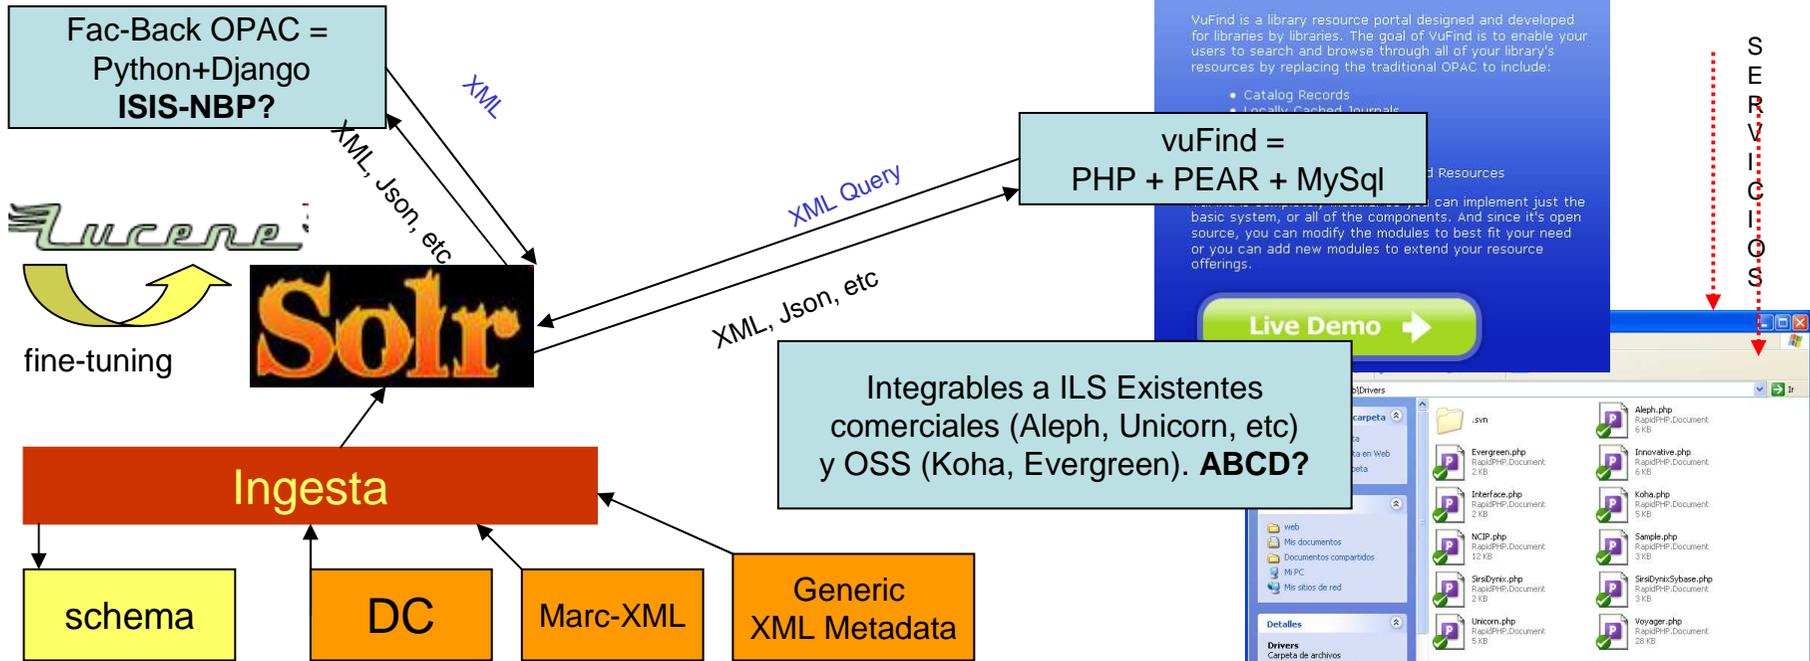

Introduction

The faceted backup OPAC project began with Casey Durfee's **Open Source Endeca in 250 lines or less** presentation at the code4lib 2007 conference, where he claimed to provide faceted features similar to the Endeca and AquaBrowser experiences using [Solr](#) and [Django](#).

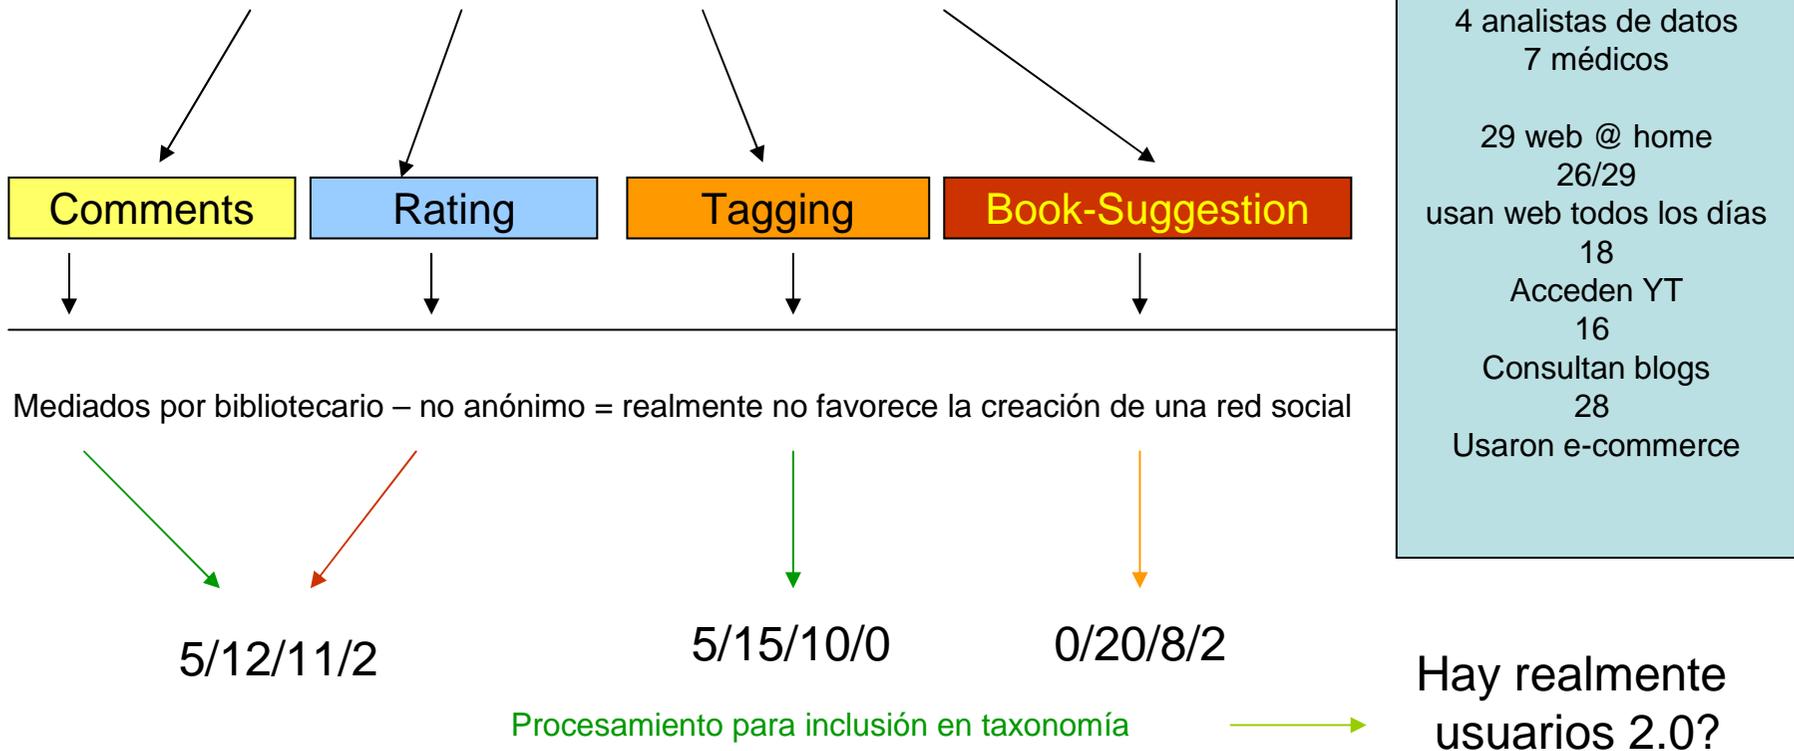

Casey's work focused strictly on the Dewey-based Horizon system he works with at the [Seattle Public Library](#). After downloading his code, I was able to tweak the code to work with our LC-based Unicorn system at the [Laurentian University Library](#). I wanted to demonstrate a faceted search interface to my colleagues, and I also needed a backup catalogue because our production ILS has a nasty habit of dying at inconvenient times. It was a good opportunity to get a bit more hands-on experience with Django and Solr - so this turned out to be a perfect project for a couple of evenings.

Casey gave me his blessing to do whatever I wanted with the code, so I made it available under the Apache 2.0 license, started with Casey's original code in the project SVN repository, and began checking in changes. Mike Beccaria, who also attended Casey's presentation, quickly joined the project as he had been working on his own fork of Casey's code and has added several enhancements. He works at Paul Smith's College and currently uses Fac-Back-OPAC for their [book catalog](#). You're welcome to join us too!
